Zuffa Bout Compensation Varies Tremendously By Athlete.....	39

QUALIFICATIONS

1. I am a Professor of Economics at the University of Florida, in Gainesville, Florida. In addition to my faculty position, I am currently serving as Chair of the Department of Economics at the University of Florida. My major fields of academic concentration are antitrust economics, industrial organization, sports economics, and applied microeconomics.

2. I received my Ph.D. in Economics from Michigan State University in 1968. Following military service, I began teaching economics at the University of Florida in 1970 and, with the exception of visiting positions at Washington University (St. Louis), the University of Hawaii, and the University of California-Berkeley, I have continued to teach at the University of Florida since that time. A detailed resume of my educational and occupational background is appended as Appendix A.

3. I have authored, coauthored, and edited over 200 books, chapters in books, and articles in professional economics journals and law reviews. Most of these publications specifically address issues of antitrust economics and industrial organization. Of particular interest, several publications address issues of antitrust standing and damages. A comprehensive list of my publications is contained in Appendix A.

4. I have coauthored (with David Kaserman) a textbook entitled *Antitrust Economics* and have taught that material for many years at the University of Florida. I also have coauthored *Law and Economics of Vertical Integration and Control* (with David Kaserman) and *Monopsony: Antitrust Law and Economics* (with Jeffrey Harrison). In Volume IIA of *Antitrust Law* (with Herbert Hovenkamp, Christine Durrance, and the late Phillip Areeda), Christine Durrance and I were the primary authors on “The Economics of Impact, Antitrust Injury, and Antitrust Damages,” §§ 390-399. I also contributed to and served as Economics Editor for *Proving Antitrust Damages*, which was published by the American Bar Association.

5. For some time, I have been interested in the economics of sports. I developed an undergraduate elective entitled “The Economics of Sports” and taught that course on several occasions. I am the author of *Sports Economics*, which is a textbook published by Cambridge University Press. Currently, I am writing a book entitled *The NCAA Cartel: Uses and Abuses of Monopsony Power*, which is under contract with Oxford University Press.

6. In addition to my faculty position at the University of Florida, I have engaged in extensive independent economic consulting activities. I have served as a consultant on antitrust matters for the Federal Trade Commission, the Antitrust Division of the United States Department of Justice, the Attorneys General of Arizona, California, Connecticut, Florida, Missouri, Oregon, and Washington, and for private law firms. I have served as an economic expert on issues of liability and damages in over 50 cases. I have been qualified to testify as an expert in antitrust economics and damages on numerous occasions. The sworn testimony that I have given during the last four years is summarized in Appendix B.

7. In the field of antitrust economics, economists must understand and interpret decisions of the courts on antitrust issues and the ways in which courts use, or fail to use, relevant economic principles in rendering their decisions. I am not a lawyer, and would not presume to instruct the Court on the law; therefore, nothing that follows should be construed as an effort by me to offer a legal opinion.

ASSIGNMENT

8. The attorneys for Defendant Zuffa, LLC (“Zuffa” or “UFC”) have asked me to review the Expert Report of Andrew Zimbalist, submitted on August 31, 2017, in *Cung Le, et al. v. Zuffa, LLC* (hereafter, “Zimbalist Report”) and to provide my economic evaluation of his analyses and form expert opinions of his analyses and set them forth in this Report. I was also

asked to analyze UFC athlete compensation, taking into account the athlete's experience as a UFC athlete.

9. For my services, I am charging my usual hourly rate of \$700. No part of my compensation is dependent upon the opinions that I have reached. My compensation does not depend on the outcome of this litigation. In preparing my report, I have been assisted by my colleague, Dr. Christine Durrance, and OSKR staff, working under my supervision and control.

MATERIALS CONSIDERED

10. I have relied upon my education and experience as an economist in carrying out my assignment in this matter. In addition, I have considered the Consolidated Amended Complaint ("CAC") submitted on December 18, 2015, the Zimbalist Report, the Zimbalist Report Errata submitted on September 19, 2017, and a variety of other documents and data sources, which are listed in Appendix C.

SUMMARY OF EXPERT OPINIONS

11. I have formed several expert opinions regarding the analysis and contentions contained in the Zimbalist Report. I have also formed an opinion on the variability of UFC athlete compensation. I summarize these opinions here and discuss them more fully below. I reserve the right to change one or more of my opinions if new information is presented through either discovery or elsewhere.

12. Measure of Damages. Dr. Zimbalist's measure of damages is the (average) difference between the labor share of total revenue going to athletes in his proposed yardstick and the labor share going to the athletes in UFC multiplied by Zuffa's revenues. The premise underlying this measure is inconsistent with standard principles of economics. Dr. Zimbalist has no economic foundation for his damage calculations. Accordingly, his damage calculations are fundamentally flawed and unreliable.

13. Yardstick Identification. In his damage calculations, Dr. Zimbalist purports to use the so-called yardstick method. He does not undertake any of the analyses necessary to use the yardstick method and his selection of the yardstick is severely flawed and, therefore, his damage calculations are speculative and unreliable.

14. Disaggregation of Damages. Dr. Zimbalist attributes the alleged damages to anticompetitive or monopsonistic abuses by Zuffa. In his damage calculations, Dr. Zimbalist has failed to disaggregate these damages. Put differently, he failed to separate the impact of lawful conduct from the impact of allegedly unlawful conduct. If any alleged action taken by Zuffa is not unlawful, the jury will have no way to isolate the portion of his damage total that must be deducted because it would not flow from an antitrust violation. Consequently, the jury would have to speculate. Thus, Dr. Zimbalist's damage estimates are fatally flawed and unreliable.

15. Contract Extensions as Exclusionary Practices. Dr. Zimbalist alleges that Zuffa has engaged in exclusionary practices through contract extensions with UFC athletes. This conduct is procompetitive rather than anticompetitive.

16. Other Exclusionary Conduct. The conduct Dr. Zimbalist describes, such as contract extensions and exclusive contracts, is often seen in other professional sports.

17. UFC Athlete Bout Compensation. UFC athletes received a wide range of compensation at each stage of an athlete's career for the entirety of the class period. There is no predominant pay level for an athlete in their first bout or any other bout.

NATURE OF THE COMPLAINT

18. The CAC includes the following general description of the allegations of anticompetitive conduct or challenged conduct in this case:

“This is a civil antitrust action under Section 2 of the Sherman Act, 15 U.S.C. §2, for treble damages and other relief arising out of the Defendant's overarching scheme to maintain and enhance its (a) monopoly power in the market for promotion of live Elite

Professional mixed martial arts (“MMA”) bouts, and (b) monopsony power in the market for live Elite Professional MMA Fighter services . . . the UFC has monopoly and monopsony power, which it gained, enhanced, and maintained through its anticompetitive scheme alleged herein. As alleged below, the UFC has engaged in an illegal scheme to eliminate competition from would-be rival MMA promoters by systematically preventing them from gaining access to resources critical to successful MMA Promotions, including by imposing extreme restrictions on UFC Fighters’ ability to fight for would-be rivals during and after their tenure with the UFC. As part of the scheme, the UFC not only controls Fighters’ careers, but also takes and expropriates the rights to their names and likenesses in perpetuity. As a result of this scheme, UFC Fighters are paid a fraction of what they would earn in a competitive marketplace.”¹

19. In Dr. Zimbalist’s report, he states that the challenged conduct “includes, among other things: (a) entering multi-fight exclusive contracts with a large share of the top Professional MMA fighters, thereby keeping this allegedly necessary input from other MMA promotions; (b) acquiring multiple actual or potential rival MMA promotion companies; and (c) impairing other MMA promoters by using its alleged dominance to threaten sponsors, promoters, and fighters who worked with or considered working with the UFC’s potential rivals.”² It is my understanding that Dr. Zimbalist assumed that the challenged conduct as a whole was a violation of the antitrust laws³ and that Zuffa had market power.⁴

20. Dr. Zimbalist specifically references the following paragraphs in the CAC as his basis for the challenged conduct: 109-113, 116-118, 125-126, 128-134.⁵ In his deposition, Dr. Zimbalist explained that most (but not all) of the paragraphs he cites in his report were intended to identify the elements of Zuffa’s conduct he assumed would be found to constitute

¹ CAC ¶ 1.

³ Deposition of Andrew Zimbalist, September 25, 2017, (hereafter, “Zimbalist Tr.”) at 43.

⁴ Zimbalist Tr. at 43-45.

⁵ Zimbalist Report ¶ 1FN 2.

anticompetitive conduct that gave rise to damages.⁶ The general thrust of Dr. Zimbalist's testimony was that the allegedly exclusionary contracts with UFC athletes and certain conduct related to those contracts constituted the alleged bad acts, but it is ultimately unclear exactly which set of acts Dr. Zimbalist assumed were anticompetitive and allegedly caused damages.⁷

ZUFFA'S ALLEGEDLY EXCLUSIONARY CONDUCT

21. The Plaintiffs allege that Zuffa is a monopsony and exercises monopsony power in a relevant market.⁸ In fact, there are many MMA promoters that compete against Zuffa. In Appendices D and E, I provide a summary of the competing promoters who have featured at least one former UFC athlete by year between 2011 and 2016. In those appendices, I present the name of the MMA promoter, the number of events promoted, and the number of bouts ranked by event (Appendix D) and by bout (Appendix E) for the years 2011 through 2016. In 2016, there were 166 promoters that featured a former UFC athlete. Those promoters promoted a total of 845 events, which included a total of 8,019 bouts.

22. To understand market concentration, I use the approach set forth in the Department of Justice (DOJ) and Federal Trade Commission (FTC) Horizontal Merger Guidelines ("Merger Guidelines").⁹ The Merger Guidelines use a measure of concentration referred to as the Herfindahl-Hirschman Index (HHI). The HHI is calculated as the sum of the squared market shares of each firm (i) out of N firms:

⁶ Zimbalist Tr. at 14-15.

⁷ Zimbalist Tr. at 21-24, 29-30; *see also id.* at 95 (offering athletes additional money for the final fight of a contract assumed as part of the challenged conduct); 111 (failure to co-promote with other organizations "probably" part of the challenged conduct); 128-129 (counter-programming).

⁸ CAC ¶ 1.

⁹ U.S. Department of Justice and Federal Trade Commission, *Horizontal Merger Guidelines* (August 19, 2010), <https://www.ftc.gov/sites/default/files/attachments/merger-review/100819hmg.pdf>.

$$HHI = \sum_{i=1}^N s_i^2$$

where s_i is the market share of firm i expressed as a whole number rather than a decimal. Higher values of HHI signal greater market concentration.

23. Ordinarily, in order to calculate an HHI, one must first define the relevant market. At this point, I will not attempt to define the relevant market in this case. Dr. Zimbalist never identified a relevant market, nor assessed concentration in any market. He did, however, suggest what he might have considered as a relevant market: “the pool of professional MMA fighters that another live professional MMA promoter could use to compete effectively with Zuffa [including] at a minimum, all Zuffa fighters.”¹⁰ If one were to define the relevant market as consisting of all promoters that promoted an MMA athlete who previously competed for the UFC, then the shares of the qualifying promoters within that market and HHI could be calculated.

24. To calculate HHIs, I used shares based on events and bouts for the promoters I have identified for the years 2011 to 2016. The results of this exercise are presented in Table 1. As one can see, the HHI in 2016 using events is 155, while the HHI using bouts is 191. These HHI calculations are similar in other years (2011 through 2015) using bouts or events. In all cases, the HHI calculations show that Zuffa is operating in an unconcentrated industry. In the Merger Guidelines, the threshold for a highly concentrated industry is an HHI of 2,500.¹¹ When

¹⁰ Zimbalist Report ¶ 8.

¹¹ U.S. Department of Justice and Federal Trade Commission, *Horizontal Merger Guidelines* (August 19, 2010), <https://www.ftc.gov/sites/default/files/attachments/merger-review/100819hmg.pdf>, at 19.

the HHI is below 1,500, the industry is deemed to be unconcentrated.¹² The values of the HHI in MMA are substantially below this threshold for all years from 2011 to 2016.¹³

Table 1: MMA Herfindahl Index by Bouts and Events, 2011-2016

UFC and Promoters that Promoted Former UFC Athletes

	2011	2012	2013	2014	2015	2016
Number of Promoters	175	161	170	141	166	166

Bout HHI	168	175	206	201	160	191

Source: Sherdog.

25. Dr. Zimbalist alleges that Zuffa has engaged in exclusionary practices through contract extensions with UFC athletes.¹⁴ This practice is procompetitive rather than anticompetitive. Suppose an athlete has a four-bout contract with Zuffa. After three bouts, Zuffa is pleased with the athlete's performance and fan appeal. Accordingly, Zuffa wants to retain that athlete's services. Before completing his or her contract, Zuffa may negotiate an extension so the athlete has a new four-bout contract. The effect of this extension is to maintain and improve the quality of Zuffa's events. Improving quality is procompetitive; it is not anticompetitive. Moreover, the contract extensions ordinarily involve increased payments to athletes.

¹² U.S. Department of Justice and Federal Trade Commission, *Horizontal Merger Guidelines* (August 19, 2010), <https://www.ftc.gov/sites/default/files/attachments/merger-review/100819hmg.pdf>, at 19.

¹³ I also reviewed an even narrower definition of the market, consisting of promoters that had promoted a former UFC athlete within a year of that athlete having competed for UFC. Even with these additional restrictions, during the class period the HHI never rises above 700, well below the 1,500 threshold. See Backup to Table 1.

¹⁴ Zimbalist Report ¶¶ 16, 22, 78.

26. In his consideration of contract extensions,¹⁵ Dr. Zimbalist fails to observe that this practice is not uncommon in professional sports. I have provided several prominent examples below.

27. Andrew Luck. In the NFL, a first-round draft choice receives a rookie contract that provides team control for four years plus a team option for a fifth year before a player can become a free agent.¹⁶ Andrew Luck was a first-round draft pick in 2012. After his first four seasons, the Indianapolis Colts prevented Luck from reaching free agency and exercised their exclusive option for Luck's 2016 season,¹⁷ after which Luck could have become a free agent. In an effort to retain Luck's services beyond the 2016 season, the Colts began working on a contract extension. Before the 2016 season began, Indianapolis and Luck agreed to a five-year contract extension that postponed Luck's free agency from 2017 to 2022.¹⁸ The total value of Luck's contract extension is \$122.97 million. Of this amount, \$87 million is guaranteed.¹⁹

28. Von Miller. As a first-round 2011 draft pick, Von Miller was also subject to four years of team control followed by an exclusive fifth year team option.²⁰ Miller was arguably the best defensive player in the NFL; he made the Pro Bowl in 2011, 2012, and 2014, was a first-team All-Pro in 2012, a second-team All-Pro in 2011 and 2014, the NFL Defensive Rookie of

the Year in 2011,²¹ and won the NFL Butkus Award for being the best linebacker in 2012.²² After his first four seasons, the Denver Broncos delayed Miller's free agency and exercised their exclusive option for Miller's 2015 season.²³ Thus, the Broncos delayed his free agency until 2016.²⁴ Then, in 2016, Denver again delayed Miller's free agency and applied their Franchise Player Designation to Miller.²⁵ Before the 2016 season began, however, Denver and Miller agreed to a five-year contract extension that postponed Miller's free agency even further, from 2017 to 2022, eleven years after he entered the league.²⁶ Miller's extension included a signing bonus of \$17 million.²⁷ Of Miller's total \$114.1 million extension, \$70 million is guaranteed.²⁸

29. Mike Trout. In MLB, rookies are subject to total team control for six years before they become free agents.²⁹ For the first three years, the player's compensation cannot fall below the league minimum, but is otherwise determined solely by the team.³⁰ After three full years of

³⁰ PennState Law, Online Documentary Supplement, Major League Baseball, 2012-2016 Basic Agreement, <http://www.mlbplayers.com/pdf9/5450407.pdf>, at Article VI, Section E "Salary Arbitration," Subsection 1 "Eligibility," at 17-18; Major League Baseball Players, Collective Bargaining Agreement, 2017-2021 Basic Agreement, <http://www.mlbplayers.com/pdf9/5450407.pdf>, at Article VI, Section E "Salary Arbitration," Subsection 1 "Eligibility," at 18-19.

service, the player is eligible for final-offer arbitration. Trout did not complete three years of service until the middle of his fourth season, and was not eligible for final-offer arbitration until his fifth and sixth season.³¹ Following his sixth season, Trout would become a free agent. Mike Trout signed his first major league contract in 2011.³² Trout quickly established himself as one of the very best players in all of MLB. He was a perennial contender for the Most Valuable Player award and Defensive Player of the Year. Trout was a star player and a fan favorite. By 2015, Trout was eligible for final-offer arbitration and free agency was within sight. Wanting to keep Trout out of the free agent market, the Angels signed Trout to a six-year contract, which would delay free agency until 2021. The value of Trout's contract was \$144.5 million.³³ In MLB, all contracts are fully guaranteed.³⁴

30. In his consideration of Zuffa's "champion's clause",³⁵ which he alleges adds a year to the contracts of Zuffa's most important athletes,³⁶ Dr. Zimbalist fails to observe that this practice is not uncommon in the NFL, which is one of the components of his yardstick. The NFL allows for "Franchise Player Designations" in which ". . . each Club shall be permitted to designate one of its players who would otherwise be an Unrestricted Free Agent as a Franchise

³¹ PennState Law, Online Documentary Supplement, Major League Baseball, 2012-2016 Basic Agreement, <http://www.mlbplayers.com/pdf9/5450407.pdf>, at Article VI, Section E "Salary Arbitration," Subsection 1 "Eligibility," at 17-18; Major League Baseball Players, Collective Bargaining Agreement, 2017-2021 Basic Agreement, <http://www.mlbplayers.com/pdf9/5450407.pdf>, at Article VI, Section E "Salary Arbitration," Subsection 1 "Eligibility," at 18-19.

³⁵ Zimbalist Report ¶¶ 10, 19-20, 78, 98.

³⁶ Zimbalist Report ¶¶ 10, 19-20, 78, 98.

Player each season [A]ny Club that designates a Franchise Player shall be the only Club with which such Franchise Player may negotiate or sign a Player Contract during the period the player is so designated”³⁷ Designating an important player as a franchise player, and thereby retaining his services for another season, helps to maintain quality and is therefore procompetitive.

31. As an example, consider the case of Le’Veon Bell. Bell completed his NFL rookie contract in 2016³⁸ and could have become a free agent at that time.³⁹ Instead, the Pittsburgh Steelers offered Bell a non-negotiable one-year, \$12 million contract through the Franchise Player Designation.⁴⁰ Just before the season began in September 2017, Bell signed the contract.⁴¹

32. Likewise, Dr. Zimbalist characterizes the Right-of-First-Refusal (ROFR) clause⁴² in Zuffa’s athlete contracts as being exclusionary.⁴³ Although the details are somewhat more complicated, he fails to recognize that a ROFR is common in NBA contracts. When a player becomes a restricted free agent in the NBA, other NBA teams can bid on restricted free agents,

³⁷ *NFL Collective Bargaining Agreement* (August 4, 2011), <https://nflabor.files.wordpress.com/2010/01/collective-bargaining-agreement-2011-2020.pdf>, at Article 10, Section 1, at 44.

³⁸ Spotrac, *Le’Veon Bell*, <http://www.spotrac.com/nfl/pittsburgh-steelers/leveon-bell-12329/>.

³⁹ In the case of Kirk Cousins, he was designated a Franchise Player two years in a row, which further delayed his free agency. JP Finlay, *Don’t count out a third straight franchise tag for Kirk Cousins, and here’s why*, NBCSports.com (May 23, 2017), <http://www.nbcsports.com/washington/washington-redskins/dont-count-out-third-straight-franchise-tag-kirk-cousins-and-heres-why>.

⁴⁰ Spotrac, *Le’Veon Bell*, <http://www.spotrac.com/nfl/pittsburgh-steelers/leveon-bell-12329/>.

⁴¹ Jared Dubin, *Le’Veon Bell officially signs \$12.1M franchise tender, returns to Steelers*, CBS Sports (Sept. 4, 2017), <https://www.cbssports.com/nfl/news/leveon-bell-officially-signs-12-1m-franchise-tender-returns-to-steelers/>.

⁴² This is also called “right to match.” The clause grants Zuffa the right to match an offer from another promoter for a period of time after the expiration of an athlete’s contract.

⁴³ Zimbalist Report ¶¶ 10, 12, 77-78.

just as other MMA promoters can bid on UFC athletes who are free agents.⁴⁴ If the original NBA team matches a player's offer, the team retains the player, but the player's compensation increases. If Zuffa matches an athlete's offer for more money from another promoter, Zuffa retains the athlete, but the athlete's compensation increases. Seen as a way of gathering market intelligence, the ROFR is procompetitive as it resolves uncertainty.

33. Dr. Zimbalist also alleges that Zuffa's contracts are exclusionary because they impose exclusivity on athletes and thereby prevent athletes from competing for other promoters during the term of their contract with Zuffa.⁴⁵ Exclusivity provisions of this type, however, are commonplace in the four comparison sports leagues that Dr. Zimbalist identifies as components of his yardstick. Below, I provide examples of contract language from MLB, NBA, NFL, and NHL contracts.

- Major League Baseball: "The Player agrees that, in addition to other remedies, the Club shall be entitled to injunctive and other equitable relief to prevent a breach of this contract by the Player, including, among others, the right to enjoin the Player from playing baseball for any other person or organization during the term of his contract."⁴⁶
- National Basketball Association: "Therefore, it is agreed that in the event it is alleged by the Team that the Player is playing, attempting or threatening to play, or negotiating for the purpose of playing, during the term of this Contract, for any other person, firm, entity,

⁴⁴ National Basketball Players Association, *NBA Collective Bargaining Agreement* (Dec. 8, 2011), <http://3c90sm37lsaecdwt32v9qof-wpengine.netdna-ssl.com/wp-content/uploads/2016/02/2011-NBA-NBPA-Collective-Bargaining-Agreement.pdf>, at Article XI, Section 4 "Qualifying Offers to Make Certain Players Restricted Free Agents" and Section 5 "Restricted Free Agency," at 230-241; National Basketball Players Association, *Collective Bargaining Agreement* (Jan. 19, 2017), <http://3c90sm37lsaecdwt32v9qof-wpengine.netdna-ssl.com/wp-content/uploads/2016/02/2017-NBA-NBPA-Collective-Bargaining-Agreement.pdf>, at Article XI, Section 4 "Qualifying Offers to Make Certain Players Restricted Free Agents" and Section 5 "Restricted Free Agency," at 288-303.

⁴⁵ Zimbalist Report ¶¶ 1, 10, 11, 13.

⁴⁶ PennState Law, Online Documentary Supplement, Major League Baseball, 2012-2016 Basic Agreement, <https://pennstatelaw.psu.edu/sites/default/files/MLB%20CBA%2012%2016.pdf>, Schedule A, Section "Player Representations," Subsection "Ability," at 280; Major League Baseball Players, Collective Bargaining Agreement, 2017-2021 Basic Agreement, <http://www.mlbplayers.com/pdf9/5450407.pdf>, Appendix A, Section "Player Representations," Subsection "Ability," at 339-340.

or organization, the Team and its assignees (in addition to any other remedies that may be available to them judicially or by way of arbitration) shall have the right to obtain from any court or arbitrator having jurisdiction such equitable relief as may be appropriate, including a decree enjoining the Player from any further such breach of this Contract, and enjoining the Player from playing basketball for any other person, firm, entity, or organization during the term of this Contract. The Player agrees that this right may be enforced by the Team or the NBA.”⁴⁷

- National Football League: “Player will not participate in any football game not sponsored by the League unless the game is first approved by the League . . . [w]ithout prior written consent of the Club, Player will not play football or engage in activities related to football otherwise than for Club or engage in any activity other than football which may involve a significant risk of personal injury Player therefore agrees that Club will have the right, in addition to any other right which Club may possess, to enjoin Player by appropriate proceedings from playing football or engaging in football-related activities other than for Club or from engaging in any activity other than football which may involve a significant risk of personal injury.”⁴⁸
- National Hockey League: “The Player further agrees . . . to give his best services to the Club and to play hockey only for the Club unless his SPC is Assigned, Loaned or terminated by the Club. . . . The Player therefore agrees that the Club shall have the right, in addition to any other rights which the Club may possess, to enjoin him by appropriate injunctive proceedings without first exhausting any other remedy which may be available to the Club, from playing hockey for any other team and/or for any breach of any of the other provisions of this SPC.”⁴⁹

34. Dr. Zimbalist objects to Zuffa’s exclusive use of video clips of bouts promoted by Zuffa in advertising subsequent bouts.⁵⁰ This is also not uncommon in professional sports. Once again, Dr. Zimbalist’s comparator sports’ contracts illustrate this practice. Despite Dr.

⁵⁰ Zimbalist Report ¶ 18.

Zimbalist's accusation that exclusive ancillary rights are anticompetitive, it is not uncommon for player contracts to include exclusive rights terms. In fact, such terms are typically found in the player contracts in the four major leagues. In the NBA, for example, all player contracts include the following clause, which grants the NBA, not the player, such rights:

The Player does not and will not contest during or after the term of this Contract, and the Player hereby acknowledges, the exclusive rights of the NBA, all League-related entities that generate BRI and the Teams (i) to telecast, or otherwise distribute, transmit, exhibit or perform, on a live, delayed, or archived basis, in any and all Media, any performance by the Player under this Contract or the CBA (including in NBA games or any excerpts thereof) and (ii) to produce, license, offer for sale, sell, market, or otherwise, exhibit, distribute, transmit or perform (or authorize a third party to do any of the foregoing), on a live, delayed, or archived basis, any such performance in any and all Media, including, but not limited to, as part of programming or a content offering or in packaged or other electronic or digital media.⁵¹

35. Similarly, in the NHL, player contracts require the player to grant the league the rights to all content of the player participating in NHL games and select events:

The Player hereby irrevocably grants to the Club during the period of this SPC and during any period when he is obligated under this SPC to enter into a further SPC with the Club the right to permit or authorize any firm, person or corporation to take and make use of any still photographs, motion pictures or electronic (including television) images of himself in uniform and agrees that thereafter all rights in such photographs, pictures and images (including the right to identify him by name) shall belong to the Club exclusively for the purposes of telecasts, film or video documentaries or features, advertisements and promotions of the Club's games, use by the media for reportorial purposes, game programs, yearbooks, magazines and the like, and purposes in which the focus is on the Club or game and not the individual Player.⁵²

36. While Dr. Zimbalist opines that the fact that some of Zuffa's contracts' durations exceed the average UFC athlete's career duration is evidence of anticompetitive conduct,⁵³ he fails to observe that (assuming the foregoing is true) this is also common in professional sports. MLB players undergo six years before reaching free agency,⁵⁴ but the average MLB career lasts only 5.6 years.⁵⁵ NBA first round draft picks typically undergo eight years before reaching unrestricted free agency,⁵⁶ but the average NBA career lasts only 4.8 years.⁵⁷ Drafted NFL players undergo four years before reaching free agency, and first round draft picks typically undergo five years,⁵⁸ but the average NFL career lasts only 3.5 years.⁵⁹

37. In his report, Dr. Zimbalist states that Zuffa requires athletes “to sign contracts locking them up for longer periods of time.”⁶⁰ But this does not mean that UFC athletes are unavailable to other promoters. Figure 1 shows the number of former UFC athletes who fought for another promoter by year from 2011 to 2016. In every year, 230 or more former UFC athletes fought for other promoters. In 2016, 309 former UFC athletes fought for other promoters. This demonstrates that athletes do leave the UFC and continue to be active with other promoters.⁶¹

⁶⁰ Zimbalist Report ¶ 19.

⁶¹ In fact, 182 former UFC athletes who left the UFC and fought for another promotion returned to and fought for the UFC. See Backup to Figure 1.

Figure 1: Former UFC Athletes Who Fought for Another Promoter, 2011-2016

DR. ZIMBALIST'S FLAWED MEASURE OF DAMAGES

38. It is my understanding that a lawful monopsonist is free to adjust its purchasing decisions and thereby reduce the price that it pays in order to maximize its profits. Although the lawful monopsonist's purchase and price decisions will differ from those in a competitive market, those decisions would not be deemed unreasonable in an antitrust sense. This is analogous to a lawful monopolist's right to charge monopoly prices and thereby earn monopoly profits.

39. If a firm enjoys monopsony power in a relevant antitrust market and the power has been deemed to be unlawful, then the unlawful monopsonist's purchase and price decisions may impose antitrust injury on suppliers of the monopsonized good or service.⁶²

40. A monopsonist maximizes its profits by restricting its purchases to the point where the marginal expenditure (*ME*) is equal to the marginal revenue product (*MRP*) of the monopsonized good or service.⁶³ The marginal expenditure on an input is equal to the change in total expenditure on that input necessary to increase or decrease purchases by one unit. The marginal revenue product is equal to the change in total revenue on sales in the output market resulting from an increase or decrease in the purchase of the input by one unit. This result is depicted in Figure 2. If the market was competitive, the price would be P_1 and the quantity would be Q_1 . In contrast, the monopsonist would purchase only Q_2 where *ME* equals *MRP*. By depressing its purchase, the monopsonist moves along the supply curve to the lower price of P_2 . In essence, there is an underpayment of $P_1 - P_2$ per unit purchased.

41. If the monopsonist is unlawful, *i.e.*, the monopsonist has attained or maintained its monopsony power through anticompetitive actions, then the underpayment would be a measure of antitrust injury and the suppliers of this good or service would appear to have standing to recover antitrust damages. The proper measure of antitrust damages (Δ) is the total underpayment, *i.e.*, the difference between the but-for price (P_{bf}) and the actual price (P_a) paid times the quantity actually purchased: $\Delta = (P_{bf} - P_a) Q_a$.

⁶² I understand that "antitrust injury" is the type of injury that flows from the anticompetitive consequences of an antitrust violation (see *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477 (1977), and Roger D. Blair & Jeffery L. Harrison, *Rethinking Antitrust Injury*, 42 Vanderbilt Law Review 1539 (1989)).

⁶³ See Robert S. Pindyck & Daniel L. Rubinfeld, *Microeconomics* 373-381 (7th ed. 2009); Alan Manning, *Monopsony in Motion* 29-52 (2003); Jeffrey M. Perloff, *Microeconomics: Theory and Application with Calculus* 396-399 (2014).

42. There are two ways to estimate the damages. One could rely on business records for the data on the actual price paid and the actual quantity purchased and estimate the but-for price. Alternatively, one could rely on business records for the actual quantity purchased and estimate the price differential between the but-for price and the actual price. In Figure 2, the measure of antitrust damages would be $\Delta = (P_1 - P_2) Q_2$, which is shown as the shaded rectangle. This is the correct measure of damages based on standard principles of economics. Dr. Zimbalist, however, makes no effort to estimate the correct measure of damages. Instead, he resorts to a measure that has no economic foundation and is inherently unreliable.

Figure 2

43. Dr. Zimbalist calculates Zuffa's pay-to-revenue ratio (PTRR) as the ratio of UFC athletes' compensation to Zuffa's total revenue. Similarly, he calculates PTRR for each of the sports in his yardstick. Dr. Zimbalist's measure of damages is the difference between the UFC athletes' compensation as a fraction of Zuffa's total revenue (Zuffa PTRR) and the average of the fraction of total revenue going to athletes in boxing and the four major league sports in North America (proposed yardstick PTRR) multiplied by Zuffa's revenues. This measure of damages is fatally flawed.

44. First, PTRR has no foundation in economic theory. Labor economists do not employ such a measure for estimating the effect of monopsony in the labor force.⁶⁴ Second, a simple example reveals that wide disparities in PTRR may exist in competitive markets. In Figure 3, the horizontal line at w_1 is the competitive supply of labor. The competitive wage rate is w_1 . The demand for labor by a firm in market 1 is depicted as MRP_1 . The demand for labor by a firm in market 2 is depicted as MRP_2 . Both demands intersect the competitive supply (S_L) at a quantity of L_1 . In both cases, the total expenditure on labor is given by $w_1 L_1$.

⁶⁴ Ronald G. Ehrenberg and Robert S. Smith, *Modern Labor Economics: Theory and Public Policy* 65 (12th ed. 2015). The authors explain how a firm in a perfectly competitive market will pay their workers the MRP of labor, defined in absolute terms, not a fixed percentage of revenue.

Figure 3

45. Total revenue can be captured as the area under the *MRP* between the wage axis and L_1 . For the firm in market 1, total revenue is area abL_10 . For the firm in market 2, total revenue is equal to the area cbL_10 . The fraction of total revenue going to labor is decidedly different across the two demands:

$$\frac{w_1 L_1}{abL_1 0} < \frac{w_1 L_1}{cbL_1 0}$$

In both cases, the markets are competitive. Thus, the premise of Dr. Zimbalist's critical measure is fatally flawed and unreliable.

46. A numerical example may be useful in illustrating this point. Suppose that the competitive wage is \$25. Suppose further that $MRP_1 = 100 - 0.075L$ and $MRP_2 = 50 - 0.025L$. By setting MRP_1 equal to MRP_2 , we find that they intersect at $L = 1,000$. Substituting $L = 1,000$ into either MRP confirms that the wage corresponding to $L = 1,000$ is \$25, which is the assumed competitive wage. In either case, the expenditure on labor will be $wL = (25)(1,000) = \$25,000$. For the firm in market 1, total revenue is equal to \$67,500 while the total revenue for the firm in market 2 is \$37,500.

47. The share of total revenue going to labor for the firm in market 1 ($PTRR_1$) is

$$\frac{25,000}{67,500} = 0.37$$

while the fraction of total revenue going to labor for the firm in market 2 ($PTRR_2$) is

$$\frac{25,000}{37,500} = 0.67$$

Thus, even in competitive circumstances, labor shares of total revenue can vary widely. This comes as no surprise since the fraction of total revenue going to labor is not a relevant indicator of competitiveness.

48. As an empirical example of the potential variation across different demands, consider the New York Giants and the Jacksonville Jaguars. In 2016, the New York Giants' total revenue was estimated to be \$477 million,⁶⁵ and the team spent \$140 million on players.⁶⁶ For the Jacksonville Jaguars, 2016 revenue was estimated to be \$377 million,⁶⁷ and the team spent

⁶⁵ The Statistics Portal, *New York Giants revenue from 2001 to 2016*, <https://www.statista.com/statistics/195282/revenue-of-the-new-york-giants/>.

⁶⁶ Spotrac, *New York Giants 2016 Salary Cap*, <http://www.spotrac.com/nfl/new-york-giants/cap/2016/>.

⁶⁷ The Statistics Portal, *Jacksonville Jaguars revenue from 2001 to 2016*, <https://www.statista.com/statistics/195269/revenue-of-the-jacksonville-jaguars-since-2006/>.

\$145 million on players.⁶⁸ The percent of revenue going to players of the New York Giants is $\$140 / \477 or 29 percent and the percent of revenue going to players of the Jacksonville Jaguars is $\$145 / \377 or 38 percent. In other words, the percent of revenue going to the players is nine percentage points higher for the Jacksonville Jaguars than for the New York Giants, even though they spent roughly the same amount of actual dollars on players. This example demonstrates that the percent of revenue going to players can be different across teams within the same sports league.

DR. ZIMBALIST'S INAPPROPRIATE YARDSTICK METHOD

49. Based on my analysis above, I have concluded that Dr. Zimbalist's measure of antitrust harm is incorrect. Put differently, Dr. Zimbalist attempts to measure the wrong thing. For this reason alone, Dr. Zimbalist's damage estimates should be rejected as being unreliable. Even if the Court found the measure to be a valid metric, Dr. Zimbalist's yardstick method is inherently flawed.

50. In *Federal Antitrust Policy*, Professor Herbert Hovenkamp describes the yardstick method:

"The 'yardstick' method of estimating lost profit can sometimes simplify the court's calculations, although it can be used in limited situations. Under the yardstick approach the plaintiff attempts to identify a market or firm similar to the plaintiff in all respects but for the impact of the antitrust violation. For example, in *Bigelow*, the plaintiff compared its own revenue during the injury period with that earned by a comparable theater operated by one of the defendants. In such circumstances, if the markets of the two firms are identical, and if the plaintiff's firm and the firm used for comparison stand in the same relative position in those markets, offer the same product mix, have comparable managements and are comparable in all other respects, then the fact finder may infer that the two would have had comparable revenues or profits but for the violation.

The above statement of the 'yardstick' methodology gives some indication of its inherent weaknesses. To the extent that either the markets or the firms being compared are

⁶⁸ Spotrac, *Jacksonville Jaguars 2016 Salary Cap*, <http://www.spotrac.com/nfl/jacksonville-jaguars/cap/2016/>.

dissimilar, the yardstick theory will not produce a trustworthy estimate of what the plaintiff would have earned but for the defendant's conduct. The method therefore works best in markets that are both local and relatively homogeneous.”⁶⁹

51. Similarly, former Department of Justice chief economist Dr. Daniel Rubinfeld explains how a yardstick analysis works:

“Under the yardstick approach, damages are measured by obtaining a ‘but-for price’ from a market (the ‘comparable market’) that closely approximates the market in which the violation occurred. The ‘but-for price’ is a measure of what the price of the product would be if the wrongful behavior had not occurred. A yardstick can come from a different but related product market in the same or similar geographic market, or from a different but related geographic market in which the same product or products are sold.

Ideally, the comparable market product should reflect the same degree of competition, the same costs, and the same demand conditions that would have prevailed in the market at issue had there been no wrongful behavior. Of course, it is quite possible for there to be no suitable yardstick in some cases. If an appropriate yardstick is available, it is important to take into account any differences in costs and the extent of competition between the yardstick market and the market at issue in the but-for world.”⁷⁰

52. In the Areeda-Hovenkamp treatise (the preeminent antitrust treatise in the field), the challenges associated with identifying an appropriate yardstick are described as follows:

“The major difficulty encountered in the use of a yardstick is finding one. The central idea behind the yardstick approach is to find a firm that is comparable in all important respects to the plaintiff. The economic performance of the yardstick firm is then used as an estimate of the performance that the plaintiff would have experienced ‘but for’ the antitrust violation. The ideal yardstick is a clone or an identical twin of the plaintiff. Short of this, one must identify a firm that is truly comparable in order for the inferences drawn to be reliable rather than speculative. One may describe the yardstick method as follows: ‘Under the yardstick approach the plaintiff attempts to identify a firm similar to the plaintiff in all respects ‘but for’ the impact of the antitrust violation.’ But the yardstick approach is demanding . . .”⁷¹

⁶⁹ Herbert Hovenkamp, *Federal Antitrust Policy* 670 (2nd ed. 1999) (hereafter, “*Federal Antitrust Policy*”).

⁷⁰ Professor Rubinfeld adds in a footnote that “A similar approach could be used if one were analyzing profit margins or rates of return. However, an appropriate margin analysis must account not only for pricing differences, but also for differences in costs between the two markets.” Daniel Rubinfeld, *Research Handbook on the Economics of Antitrust Law* 5 (November 21, 2009) (hereafter, “Rubinfeld”).

⁷¹ Phillip Areeda, Herbert Hovenkamp, Roger D. Blair, & Christine Pette Durrance, *Antitrust Law* (4th ed. 2014), Volume IIA, § 392f, pp. 383-84 (hereafter, “*Antitrust Law*”).

53. Dr. Zimbalist does not conduct a yardstick analysis. He does not search for a business that is comparable to Zuffa in all important respects. Instead, he uses the sports leagues that he has available to him (NFL, MLB, NBA, and NHL) and some limited data from boxing. He then calculates an average PTRR across these five sports. Even if the PTRR were relevant, which it is not, this average across five different sports cannot serve as a yardstick for Zuffa's but-for PTRR.

54. Dr. Zimbalist testified that he uses the yardstick approach to estimate antitrust damages that he incorrectly identified as the difference between Zuffa's actual PTRR and Zuffa's PTRR in the purported but-for world, but what he has created is not a true yardstick. If one is going to use the yardstick approach in this way, the yardstick must be sufficiently similar to the Defendant or Plaintiff, as the case may be, so that the actual performance of the yardstick is a reasonable estimate of the but-for performance of the Plaintiff or Defendant. The reason for this is that the yardstick's actual performance is going to be used as an estimate of the but-for performance of the target firm. Dr. Zimbalist does not appear to have conducted any analyses that would inform him of the similarities and dissimilarities between Zuffa and the sports he used as components in constructing his yardstick.

55. In his report, Dr. Zimbalist does not analyze any aspect of the sports used in constructing his yardstick, which is an average across five sports. Consequently, he cannot know whether this average is a reliable estimate of Zuffa's performance in his purported but-for world. It is unclear why Dr. Zimbalist selected boxing and the four major league sports as components of his yardstick.⁷² Moreover, in his yardstick analysis, he does not include Major League Soccer (MLS), tennis, or any other sports. It is noteworthy that the PTRRs for MLS and tennis are below

⁷² Zimbalist Tr. at 237-240.

Dr. Zimbalist's average PTRR. For example, the PTRRs for MLS range between 21 and 28 percent, while the PTRRs for tennis range from 11 to 17 percent, based on available data (see Table 2).

Table 2: Comparison of Sport Entity PTRRs

Entity	Sport	Years	PTRR	Source
<i>Dr. Zimbalist's Yardsticks</i>

56. In his deposition, Dr. Zimbalist conceded that “certain standards” for performing a yardstick analysis exist though he testified that he could not name any specific “article or articles or a book” or “any journal article.”⁷³ Instead of referencing the extant literature (such as the work of Professor Hovenkamp or Dr. Rubinfeld), Dr. Zimbalist stated that it would be “desirable” for the yardstick “to have everything exactly the same except the level of competition,” but that he did not have that, and so instead he fell back on a lesser standard, namely to “try to find as much as possible in common except for the variable that you’re trying

⁷³ Zimbalist Tr. at 148-150, 165-66.

to identify the impact of.”⁷⁴ The standard “as much as possible in common” is not a standard recognized in the field. The recognized standard is that described by Professor Hovenkamp as “similar to the plaintiff in all respects but for the impact of the antitrust violation” and similarly by Dr. Rubinfeld as “closely approximating the market in which the violation occurred” and likewise by Areeda and Hovenkamp as “comparable in all important respects.”

57. Dr. Zimbalist appears to have assumed that his proposed yardstick was suitable without “tak[ing] into account any differences in costs,” “the extent of competition between the yardstick market and the market at issue,” whether “the markets of the two firms are identical,”⁷⁵ whether Zuffa and the yardstick “stand in the same relative position in those markets,” whether Zuffa and the yardstick “offer the same product mix,” whether Zuffa and the yardstick “have comparable managements,” whether Zuffa and the yardstick “are comparable in all other respects,” whether the markets “reflect the same amount of competition,” or whether Zuffa and the yardstick have the “same demand conditions.”⁷⁶

58. Dr. Zimbalist’s testimony is revealing. First, Dr. Zimbalist essentially explains how he has not used the appropriate economic standard for using a yardstick. He assumed that the same sports identified by Plaintiffs in their Complaint were appropriate components of the yardstick for his analysis, without considering whether there were any differences that could invalidate some of the comparator sports as adequate components of the yardstick. This approach is economically unsound—one first must analyze whether a yardstick is valid before comparing the yardstick with the target firm. Otherwise it is a fruitless exercise, because the expectations for

⁷⁴ Zimbalist Tr. at 151.

⁷⁵ My understanding is that Plaintiffs in this case have argued that UFC is in a dissimilar market vis-à-vis Dr. Zimbalist’s comparators. CAC ¶¶ 60, 62, 79-80, 82, 84.

⁷⁶ *Federal Antitrust Policy* at 670; Rubinfeld at 4.

the yardstick will necessarily differ from the expectations for the target firm if they are not reasonably comparable, and any resulting analysis will be inherently speculative.

59. Second, by rejecting the use of a single sport as a yardstick, Dr. Zimbalist revealed that he does not know what a yardstick is supposed to be. The yardstick methodology contemplates using the actual performance of a firm or market, not an average, as an estimate of the but-for performance of the Defendant or Plaintiff, as the case may be. But he does not use any of the comparator sports as a yardstick. Instead, he averaged the PTRRs of the five different sports and compared that average to Zuffa's actual PTRR.

60. Dr. Zimbalist's use of an average PTRR across four major league sports and boxing is a fundamental flaw in his yardstick methodology. The use of an average inherently masks variability. In volume IIA of the Areeda-Hovenkamp treatise, the limitations of averaging are explained:

"The putative yardstick must be comparable to the plaintiff in all important respects: product(s) offered, structure of the firm, management, geographic market, and so on. Some courts have specifically rejected the use of industry averages. The rejection of industry averages is understandable because an industry average necessarily involves a potentially wide range of firm characteristics regarding location, product quality (both level and consistency), managerial acumen, service, marketing and promotion, financial stability, and the like. There is no way to determine how closely the plaintiff matches the average profile, and therefore one cannot be confident that the plaintiff would have performed as did the industry on average."⁷⁷

61. Dr. Zimbalist calculates an average PTRR across the five sports that he included. He characterizes the difference between that average PTRR and Zuffa's actual PTRR as a measure of antitrust damages. But he does not explain why an average is relevant or appropriate. The average PTRR does not reflect the actual performance of any of the comparator sports. For example, the NFL and NBA annual PTRRs are below Dr. Zimbalist's annual yardstick PTRR in

⁷⁷ *Antitrust Law*, Volume IIA, § 392f, pp. 385-386.

every year.⁷⁸ It is not clear why that difference is not an unlawful underpayment. It is also not clear why the but-for PTRR to UFC athletes should be above the NFL but below boxing. There is simply no explanation why UFC athletes should receive a greater share of revenue than some comparator athletes but less than others.

62. In adopting the average PTRR across MLB, NBA, NFL, NHL, and boxing as the components of his yardstick, Dr. Zimbalist does not appear to have considered fully the differences between his proposed yardstick and Zuffa. These differences may significantly affect the PTRR of UFC athletes and athletes in the comparator sports.

63. First, the sports entertainment provided by Zuffa is different from that provided by MLB, NBA, NFL, and NHL. Thus, the products offered are decidedly different. Consequently, the sports entertainment provided may appeal to different audiences. This, in turn, may significantly influence demand.

64. Second, league revenues in the four major leagues are many times the revenues generated by Zuffa. Table 3 displays the total revenues for Zuffa and the four major sports leagues by year from 2006 to 2015. In 2015, total revenue for Zuffa was \$556 million, while total revenue was \$8.4 billion for MLB (over 15 times as large as Zuffa) and total revenue for the NFL was \$12.2 billion (over 20 times as large as Zuffa). In fact, Zuffa's annual revenue was more comparable to a single NFL team (*e.g.*, the New York Giants) than the entire NFL. Assuming *arguendo* Zuffa and the four major sports are in the same or similar markets (which Dr. Zimbalist does not address), the vast gap in revenue shows they do not have the same amount of demand or stand in the same relative position in those markets.

⁷⁸ Zimbalist Report Table 4; Zimbalist Report Errata Table 4-E.

Table 3: Annual Total Revenues of Zuffa and Big Four, 2006-2015*Millions, USD*

Year	Zuffa	MLB	NBA	NFL	NHL
2006	\$182	\$5,110	\$3,370	\$6,540	\$2,270
2007	\$226	\$5,480	\$3,570	\$7,090	\$2,440
2008	\$275	\$5,820	\$3,770	\$7,570	\$2,750
2009	\$336	\$5,900	\$3,790	\$8,020	\$2,820
2010	\$446	\$6,140	\$3,810	\$8,350	\$2,930
2011	\$440	\$6,360	\$3,960	\$8,820	\$3,090
2012	\$450	\$6,810	---	\$9,170	\$3,370
2013	\$548	\$7,100	\$4,560	\$9,580	---
2014	\$486	\$7,860	\$4,790	\$11,090	\$3,700
2015	\$556	\$8,390	\$5,180	\$12,160	\$3,980

Note: Excluding 2012 NBA and 2013 NHL revenues due to the 2011-12 NBA and 2012-13 NHL lockouts.

65. Third, the athletes in the four major leagues are unionized and bargain collectively with management, while MMA athletes are independent contractors and are not unionized. Collective bargaining likely impacts compensation in the four comparator sports leagues in myriad ways, but at minimum, one would expect that unionized athletes would have increased leverage to demand higher pay, which would impact the percentage of revenue they receive.⁷⁹ As a result, one likely cannot compare compensation between unionized and non-unionized athletes in a yardstick analysis because the compensation outcomes would differ regardless of the differences in competition between the yardstick and target firm.

⁷⁹ For example, David Berri, Michael Leeds, & Peter von Allmen analyzed the NBA and showed that collective bargaining accounts for a significant percentage of NBA player compensation. Their research also showed that NBA players generated about 26% of the revenues based on their marginal productivity, but were paid closer to 50%. They conclude that the leverage of having a players' union resulted in bargaining that doubled the players' pay as a fraction of total revenue. David Berri, Michael Leeds, & Peter von Allmen (2015). "Salary Determination in the Presence of Fixed Revenues, *International Journal of Sport Finance* (10)1, pp. 5-25.

66. Fourth, while MMA is a relatively young sport, with the UFC beginning in 1993, the four major leagues are considerably older and well established. MLB formed in 1903,⁸⁰ the NHL in 1917,⁸¹ the NFL in 1920,⁸² and the NBA in 1949.⁸³ This suggests Zuffa is in a different relative position in the market than the comparator sports, and likely explains some of the difference in demand between Zuffa and the comparator sports.

67. Fifth, the four major leagues have different business models than Zuffa. The four leagues have large television contracts that generate enormous guaranteed fixed revenues.⁸⁴ Zuffa, on the other hand, generates a significant amount of its revenue from pay-per-view, a variable revenue stream that can vary from event to event.⁸⁵ As Dr. Zimbalist testified, a firm with more variable revenue would expect a higher rate of return.⁸⁶ If firms have different expected rates of return, it would not make sense to compare them in a yardstick analysis or make a comparison without controlling for that difference.

⁸⁵ In deposition, Zuffa Senior Vice President of Strategy, Denitza Batchvarova stated, “for every single [pay-per-view] event we are starting from buy zero. You have to convince customers to buy it.” Deposition of Denitza Batchvarova, January 25, 2017, at 202.

⁸⁶ Zimbalist Tr. at 207-208.

68. Dr. Zimbalist also does not appear to have considered the possible influence of player drafts, salary minimums, salary caps, luxury taxes, and restricted free agency in the four major league sports. In some cases, these differences show that Zuffa has a more open labor market than the comparator sports (*e.g.*, an up-and-coming MMA athlete can choose which promoter to sign with, and is not forced to participate in a draft). In other cases, certain UFC practices alleged to be anticompetitive are nearly identical in the comparator sports (*e.g.*, exclusivity, ancillary rights). Dr. Zimbalist fails to account for these differences or similarities in his analysis, and therefore fails to consider whether some of the difference between Zuffa and the comparator sports may be caused by these factors—not Zuffa’s allegedly anticompetitive conduct.

69. Dr. Zimbalist also identified boxing as one of the five sports that he included in his yardstick calculation of an average PTRR. Like MMA, boxing is an individual rather than team sport, it involves combat, and events involve multiple bouts. But boxing turns out to bring serious problems to the analysis. First, Dr. Zimbalist used a two-and-a-half year average from a single promoter for each of the six years in the Plaintiffs’ alleged damage period.⁸⁷ As a result, the boxing data fail to exhibit variability over the six years that the four major leagues display.

70. Second, Dr. Zimbalist relies on data from only one promoter, Golden Boy, that were drawn from an expert report in another litigation.⁸⁸ The data Dr. Zimbalist relied upon are quite different from those produced by Golden Boy in this litigation. Dr. Zimbalist claims that the PTRR for boxing is twice as high as the PTRR found in Golden Boy’s actual financial

⁸⁷ Zimbalist Report ¶¶ 111-112, Table 2, Table 4; Zimbalist Report Errata Table 2-E, Table 4-E.

⁸⁸ Dr. Zimbalist relies on Exhibit 3, a detail of Golden Boy “Income from Boxing Operations,” from Expert Report of Gene Deetz, September 6, 2016 in *Golden Boy v. Hayman*. Zimbalist Report ¶ 111; Zimbalist Work Papers.

records. Dr. Zimbalist assigns boxing (through his Golden Boy proxy) a PTRR of 62.2%.⁸⁹ Golden Boy's financials do not show nearly that high a PTRR—rather, they show a 29% PTRR for 2015 and 14% PTRR for 2016.⁹⁰ This, of course, biases Dr. Zimbalist's average yardstick PTRR – and renders it unreliable.

71. Third, by using data for only one promoter to represent the entire boxing industry, Dr. Zimbalist loses the variability that might accompany other promoters and thereby influence the PTRR. Boxing firms also appear to systematically overstate the percentage of revenue going to athletes because they book money paid to another boxer's promoter as athlete compensation.⁹¹ This artificially inflates athlete compensation and, by definition, compensation as a percentage of revenue. For all these reasons, Dr. Zimbalist's boxing comparison is highly unreliable on its own, and also significantly biases his average yardstick PTRR.

72. While Dr. Zimbalist does not use Bellator or Strikeforce (pre-acquisition) as one of the components of his yardstick, he does use their PTRR as a robustness check on his yardstick estimate. In his report, he states:

“... the appropriate and conservative nature of my yardsticks is corroborated by the fighter share of revenue paid out by other MMA promotions who have attempted to compete with Zuffa. During 2010 and 2011, the two years before it was acquired by Zuffa, Strikeforce paid approximately 63% of its revenues to its fighters. Similarly, during the period from 2010 through 2015, Bellator paid approximately 48.5% of its revenue to Fighters. These MMA promoters are Zuffa's closest competitors and their business models are similar to Zuffa's. The fact that their fighter pay ratio, which has an unweighted mean of 55.75% during the Class Period (through the end of 2016), is in the

⁸⁹ Zimbalist Report Errata Table 2-E, Table 4-E.

⁹⁰ GBP000001 (“Golden Boy Promotions Profit & Loss – 2015”). 29% = \$11,613,960.46 / \$40,113,787.29. GBP000002 (“Golden Boy Promotions Profit & Loss – 2016”). 14% = \$7,800,365.90 / \$55,195,256.93.

⁹¹ Deposition of Robert Arum, October 17, 2017, at 50-53.

ballpark of my benchmark estimates further bolsters the reasonableness of my benchmarks.”⁹²

73. Dr. Zimbalist fails to discuss or account for a basic proposition in yardstick analysis: the yardstick should not be in the same market as the defendant.⁹³ In this case, Bellator (and Strikeforce before it) competed against Zuffa in the market, and were thus subject to market forces in part affected by Zuffa’s competition. The PTRRs of these firms could be higher because they earned less revenue rather than because they paid more to the athletes. There is no evidence that Dr. Zimbalist untangled Zuffa’s impact on Bellator’s or Strikeforce’s PTRRs. Consequently, this renders their PTRRs unreliable as a yardstick comparator or robustness check.

74. Moreover, since Bellator was unprofitable, it is not sensible to use Bellator as a yardstick comparator or robustness check.⁹⁴ To do so would mean that the UFC would be unprofitable in the purported but-for world. From an economic perspective, this makes no sense.

DR. ZIMBALIST’S FAILURE TO DISAGGREGATE DAMAGES

75. The Plaintiffs allege that Zuffa has engaged in a variety of monopsonistic abuses that resulted in antitrust damages. Dr. Zimbalist adopted these allegations and produced an estimate of the damages. As I explained above, Dr. Zimbalist’s measure of damages has no economic foundation. Consequently, his damage estimate is unreliable. Even if Dr. Zimbalist’s measure of damages were reliable in the aggregate, his failure to disaggregate his damage estimate may require the jury to speculate. In other words, he failed to attribute specific damage amounts to the various practices that are alleged to be anticompetitive.

⁹² Zimbalist Report ¶ 130 (footnote omitted).

⁹³ Niels, G., Jenkins, H. and Kavanagh, J.; *Economics for Competition Lawyers* 524-525 (Oxford University Press 2011).

⁹⁴ SBPCL00002101.

76. Dr. Zimbalist attributes the Plaintiffs' damages to an array of allegedly anticompetitive conduct. One practice that was included in this array is Zuffa's contract extensions of high performing athletes.⁹⁵ Assuming this practice is either procompetitive or competitively neutral, the damage estimate must be reduced by the amount that should have been attributed to the impact of those contract extensions on Zuffa's PTRR.

77. Dr. Zimbalist's failure to disaggregate his damage estimate leaves the court or the jury with no evidentiary foundation for making the appropriate adjustment. As a result, the jury must speculate. Similarly, Dr. Zimbalist appears to assume all multi-year contracts will be found to be anticompetitive, despite their presence across the comparator sports used in his proposed yardstick. To the extent the court or jury does not find all multi-year contracts to be anticompetitive, they will be left with no valid estimate of damages from Dr. Zimbalist. Dr. Zimbalist also finds that the exclusivity provisions in Zuffa's contracts are anticompetitive. As I have shown above, similar provisions can be found in the player contracts in MLB, NBA, NFL, and NHL. Thus, they are not uncommon in professional sports. If the court or jury finds that the exclusivity provisions are not anticompetitive, any alleged damage would have to be adjusted for the amount attributable to exclusivity. Dr. Zimbalist's failure to disaggregate his calculation would require the jury to speculate.

78. Dr. Zimbalist testified in his deposition that there is a core set of challenged conduct that he considers necessary for his damage estimate to be accurate.⁹⁶ If one of the elements of the challenged conduct is found to not violate the antitrust laws (perhaps because it

⁹⁵ Zimbalist Report ¶ 14.

⁹⁶ "Again, my estimate of damages is based upon the overall impact of a panoply of restrictive clauses." Zimbalist Tr. at 34. *See also id.* at 21-24, 29-30, 95, 111, 128.

is common in sports and procompetitive), then as I understand Dr. Zimbalist's testimony, his damages analysis would not be an accurate assessment of the damages for any remaining alleged violations. Additionally, Dr. Zimbalist acknowledges in his deposition that if there is conduct that the Court finds to be legal or procompetitive, his work cannot be used to estimate what portion of damages should be removed from the total.⁹⁷

ZUFFA BOUT COMPENSATION VARIES TREMENDOUSLY BY ATHLETE

79. I also examined the total bout compensation of each athlete for each bout to assess whether the UFC athletes receive common levels of payments at each stage of their tenure with the UFC. I grouped UFC compensation data by year and bout number of the athlete. For example, I analyzed all UFC athlete compensation in 2013 for all athletes in their first bout with the UFC. While below I present this single example, I provide a full set of tables (for each year and bout number) in Appendix F. Based on this analysis, one can see the heterogeneity in compensation across athletes with the same amount of UFC experience (see Table 4). For example, in 2013, 30 athletes on their first bout earned \$11,000, while another 30 earned twice as much, either \$21,000 or \$22,000, and another 30 earned at least twice that amount, from \$45,000 to \$574,720. While \$11,000, \$21,000, and \$22,000 are most common in 2013 for first-bout UFC athletes, more than half of all first-time UFC athletes received some other amount, ranging from under \$10,000 to over \$500,000. Diversity in compensation is common; in 2014, one athlete on his or her eighth bout earned \$11,000, while another earned \$793,688. These tables demonstrate the range of UFC athlete compensation at the individual level, even when accounting for the

⁹⁷ "Q. Now, you're referring to that package with a panoply of contract provisions and behavior that flows from it. You have not broken down that package to estimated damages from any parts, individual parts, of the package, correct?"

A. That's correct."
Zimbalist Tr. at 35-36.

athletes' UFC experience. There is no common pay scheme (or ladder) based solely on year and amount of UFC experience. I have included full tables for all bout numbers and levels of compensation for the years 2011-2016 as Appendix F to show that this variation is both substantial and extremely common for all UFC athletes in all years.

Table 4: Zuffa Athlete Pay by First Bout, Bout Compensation, 2013

Year	Bout Number	Bout Compensation	N
